PROFILE

Frontend engineer with 5+ years of experience building product-grade interfaces for CRM systems, admin dashboards, fintech platforms, high-end websites, and embedded widgets. I focus on clean implementation, scalable frontend architecture, strong usability, and the details that make products feel reliable in production.

WORK EXPERIENCE

Frontend Engineer

Spectra Technologies · Full-time · Remote

April 2026 – Present

Building frontend systems for SpectraPay — a Nigerian fintech platform bridging the gap between cryptocurrency and everyday financial life.

- Developing the web platform for crypto-to-fiat payment solutions
- Building intuitive dashboard interfaces for wallet management and transactions
- Implementing secure, performant UI flows for KYC, payments, and onboarding
- Working closely with design and backend teams to deliver production-ready features

Stack: React, Next.js, TypeScript, Tailwind CSS, REST APIs

Frontend Developer

VastRemit · Full-time · Remote

April 2026 – Present

Building the frontend for a cross-border payment platform that enables African users to send and receive payments without needing a dollar account.

- Developing and maintaining core payment flows and dashboards using React and NextJs
- Building responsive, accessible UI components for transaction and account management
- Implementing real-time data handling for payment status and notifications
- Collaborating with backend and product teams to ship user-facing features

Stack: React, Next.js, Tailwind CSS, REST APIs

Frontend Developer

Tech 201 · Full-time · Remote

July 2025 – Present

Building and maintaining modern web applications using Next.js and React, focused on performance optimization and scalable frontend architecture.

- Built and maintained web applications using Next.js, React, and Tailwind CSS
- Developed dynamic SSR/ISR pages for improved SEO and performance
- Collaborated with product designers and backend engineers to ship scalable features
- Built modular, reusable UI components improving code reusability across projects
- Integrated RESTful APIs and optimized client-side rendering

Achievements:

- Improved page load times by 40% through SSR optimization
- Delivered 5+ major features on schedule

Stack: Next.js, React, Tailwind CSS, REST APIs, Git

Frontend Developer

2021 – Present

Upwork & Fiverr · Freelance · Remote

Led frontend development for event management platforms, building responsive and accessible user interfaces.

Frontend Developer

2020 – 2024

Dimmy Decor Events · Full-time · Lagos, Nigeria

Led frontend development for event management platforms, building responsive and accessible user interfaces.

Frontend Developer

2019 – 2020

Fiverr · Freelance · Remote

Started my freelance journey building responsive websites and React applications for diverse clients.

Core Skills
