PROFESSIONAL SUMMARY

Frontend Engineer building high-performance, accessible web applications in React, Next.js, and TypeScript, including secure fintech interfaces for KYC and crypto-to-fiat payment flows. Track record of cutting load times, shipping design systems adopted org-wide, and reducing regression bugs through disciplined testing. Currently deepening TypeScript and modern state management (Zustand, TanStack Query) in production codebases.

SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React, Next.js

State & Data: Zustand, TanStack Query, Context API, REST API Integration

Testing & Performance: Jest, React Testing Library, Unit Testing, Core Web Vitals (LCP, FCP), Performance Optimization

Design & Tooling: Storybook, Responsive Design, Web Accessibility (WCAG 2.1 AA), Git, Agile/Scrum, Code Review, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Frontend Engineer, Tech201 *Jul 2025 – Present*

- Architected a hybrid SSR/ISR Next.js storefront with server-rendered home page, cached server-side data fetches, and CDN image delivery via ImageKit, holding First Contentful Paint at 0.4s and admin dashboard LCP at 1.5s.
- Led end-to-end delivery of Oyato, a full-stack e-commerce platform (Next.js 16, React 19, Tailwind, REST, MongoDB) spanning a customer storefront and admin dashboard.
- Shipped catalog search and advanced filtering, instant-payment and BNPL checkout (Paystack, Flutterwave, Monify), order tracking, wishlist, referral flows, and Google and email authentication.
- Consolidated admin order management into a single view with status tabs, five-way filtering, bulk cancel, one-click status progression (Review to Prepare to Ship to Delivered), and Excel export, cutting per-order admin handling effort by approximately 20% (internal estimate).
- Centralized warehouse inventory tracking and shipped real-time support chat using Ably, plus full role-based access control (RBAC) with super-admin-created admin roles.
- Implemented BNPL credit agreements with BVN verification for compliant, secure checkout.
- Reduced production regression bugs by 25% across release cycles by building comprehensive test coverage with Jest and React Testing Library.

Contract Frontend Engineer, Spectra Technologies *Apr 2026 – Jul 2026*

- Led greenfield development of a secure crypto-to-fiat wallet dashboard, shipping MVP in 8 weeks using React, Next.js, TypeScript, and Zustand for early adopters in the African fintech market.
- Built KYC identity verification, real-time transaction history, and P2P onboarding flows end-to-end, from UI through production, in React and Next.js.
- Partnered with the CTO to implement token management and request-throttling architecture, securing 50+ API endpoints against abuse patterns.

Frontend Developer (Contract), VastRemit *Apr 2026 – May 2026*

- Engineered dynamic form handling and validation logic for cross-border remittance and currency-conversion flows using React and TanStack Query.
- Built responsive, accessible UI components to manage real-time transaction statuses across the remittance flow.

Frontend Developer, Freelance — Fiverr, Upwork & Direct Clients *2019 – 2025*

- Shipped 15+ production-grade web applications across e-commerce and events-management clients, owning each project end-to-end from requirements through deployment and maintenance.

- Translated Figma designs into pixel-perfect, WCAG 2.1 AA-accessible interfaces, maintaining a 3.9-star average client rating and a 60%+ repeat/referral engagement rate.
- Sustained a 4-year client engagement with an events-management business, continuously delivering feature requests and performance improvements.

EDUCATION

B.Sc. Computer Science — University of the People (Remote)
2023 – Present

CERTIFICATIONS

- Legacy JavaScript Algorithms and Data Structures — freeCodeCamp, 2023
- Front-End Development Libraries — freeCodeCamp, 2023
- Legacy Responsive Web Design — freeCodeCamp, 2022

AWARDS

- Certificate of Recognition — Arit Developer Circle Hackathon, May 2025
